## Belinda Townsend

Director Procurement Operations and Delivery

Department of Infrastructure, Planning and Logistics

The Department of Infrastructure, Planning and Logistics (DIPL) was established by the Northern Territory Government on September 12, 2016. The government created the department to bring together many of the key functions that drive land use, infrastructure and transport.

DIPL aim to be recognised as the experts in government, achieving best practice infrastructure programming, procurement and construction, while maximising the use of NT business and resources.

As some of the major suppliers of professional services to Government, Consult Australia member firms work often and closely with NT Government Departments and Agencies.

Our members are invited to join us for breakfast with **Belinda Townsend**, to better understand current procedures and expectations when responding to Government tenders.

Priority points of discussion include:

- Update on current state of play regarding the NTG procurement reform process
- Tender assessment and short listing
- Standards required by the Department regarding NTG contracts

**BOOK NOW!!** Early bookings encouraged – limited places available
