About us

Consult Australia is the association representing the business interests of consulting firms operating in the built and natural environment. We specialise in helping businesses of all sizes to create a commercial platform from which they can operate successfully and sustainably while making the business side of running their firm easier and less time consuming.

By acting as the voice of the industry, facilitating collaboration and networking, and by providing tailored education and support services, Consult Australia frees its members to do what they do best and what they enjoy most about providing professional consulting services: consult!

Our member firms' services include, but are not limited to: architecture, landscape architecture, engineering, planning, cost consulting (quantity surveyors), project management and environmental science.

We represent an industry comprising some 48,000 firms across Australia, ranging from sole practitioners through to some of Australia's top 500 firms with combined revenue exceeding \$40 billion a year.

All Consult Australia members agree to be bound by the Consult Australia Code of Ethics.

Why choose us?

Our Member Firms | Northern Territory Operations

Our member firms provide local experience and on the ground service - a critical requirement to successfully deliver projects in the Northern Territory.

Our member firms have the capability to provide services for small customised projects (Tier1 consultancy fees under AUD \$15K) through to multi disciplinary teams delivering major projects (Tier 5 consultancy fees over AUD \$5M). Our firms enjoy strong business relationships and embrace teaming and joint ventures allowing them to draw upon a wide range of expertise, further build Territory capability and provide complete solutions locally.

We support the growth of locally held skills in the Territory by employing local graduates, supporting and continually upskilling our professionally qualified staff via access to interstate or global expertise in the undertaking of professional work to facilitate skills transfers and develop the local talent to global benchmarks.

Our consulting firms are highly attuned to local regulatory, technical and environmental constraints facing authorities and developers within the Northern Territory and are capable of delivering projects with high standards of safety, quality and ethics across the entire asset value chain. Our member firms service both the private and public sector.
